Candidate's Statement (reproduced exactly as submitted):

As a former Assembly member who served 4 terms conscientiously on that body, I am familiar with all facets of Borough Government. Conversely, most local elected officials, staff, the general public and those in opposition camps are familiar with me. I have gained the respect and acknowledgement of the majority of those folks.

Albeit, with a measure of reservation.

Consensus should not *always* be the rule. I have and always will abide with straight talk. I have never tried to be all things to all people. Often times I have been the nonconformist, the free thinker, the maverick. These are tough traits to push when you're bucking up against two former mayors who control their aligned ideological camps Borough wide, but I knew that going in. If you are part of the majority of Peninsula voters that are *not* politically hard wired and understand the need the Borough has for a conscientious leader at this time, I need your vote. Together we can address the critical issues of budgetary constraints without rising taxes, the formulation of a new CPH governance model and bonafide economic development by fully supporting a resurgent Cook Inlet energy sector. Thank you.
