The Board of Directors does have two concerns regarding the language of Ordinance 2004-012. While the Board understands the need for all Service Areas to have similar language this language does not address the qualifications specific to each individual Service Area.

North Peninsula Recreation S.A. has every confidence that a Borough Mayor would not appoint an individual with out proper qualifications. However, we feel it is important enough to request that language be added to reference specific qualification per positions.

A Service Area is a very unique solution for the betterment of a community. The Board of Directors is elected to represent and be in tune with the community. Each community in the Kenai Peninsula Borough is different. That is why the Board of Director's recommendation for hiring a specific individual should be given more weight when an appointment is made.

At this time the North Peninsula Recreation S.A. Board of Directors will support Ordinance 2004-012 if the two concerns referenced in the letter can be addressed.
